This application is to request a revision to application Cert.#7-94

We are requesting approval to raise our walkway step 8" inches in regards to the previous submitted layout. We are raising the grade of our front yard hence we desire to have the walkway stone higher as well as the addition of a front step at the end of the walk. The step is 8" inches thick and 2'3" x 5'7" in size. A diagram of the layout is attached.

Plans are to keep the stairs layed out as originally planned. The only revision is that we will need seven stones to do the job. We originally stated three which would require huge botton stones which are not readily available. The final appearance would be the same

We also request approval to add two granite posts to the walkway, 12 inches back from the step up onto the walk. Posts would be antique granite, three feet high and approx 8" square.
